Subject: Arroyo Grande followup meeting schedule

Hello Arroyo Grande team,

Thanks for everyone's time today on the call. Since we do not know the timing of when you will be ready with your draft responses, please discuss amongst yourselves and let EPA know a couple of options for a follow-up meeting to review the information that DOGGR/Water Board is considering submitting in response to the EPA comment letter. Our understanding is that the State would plan to provide the actual maps, data, etc for EPA and its consultants to see in real time, and to discuss. If EPA/Cadmus could see this information sometime beforehand, that would be helpful to reduce the amount of time for the meeting, but please provide your preferences. It's difficult to predict, but I think we would likely need to set aside at least two hours. We should also discuss meeting location. In any case we will need our consultants to be able to see the information you are presenting in electronic form, so let's factor that into our logistics too. Thanks all!

Sincerely,

Michel e
